### Radboudumc

### **GUIDELINES FOR EUROPEAN CREDITS**

Disclaimer: The courses that are offered are constantly changing. This overview is not aimed to be complete, but to give an indication of the courses offered.

European Credits (EC) are primarily meant to quantify transferable skills and competencies learnt. As such work placements spent in other laboratories do not count for EC points. One EC equates to 28 hours of study.

This document aims to standardize the number of points awarded per course by using specific examples. This is by no mean an exhaustive list of possibilities. Totals should be rounded up/down as appropriate. For your portfolio, group similar events together per year.

The EC points mentioned in the course descriptions are leading.

More information about Radboudumc courses (<u>link</u> and old <u>link</u> because not all courses are on OLO yet). More information about Radboud University courses (<u>link</u>)

Intended meetings	Duration & Frequency (days, hours)	Self study / preparation time	EC Points	Additional info
