

Meet the Expert

Guidelines on multi-omics statistics and reproducible results

Sander Bervoets & Casper de Visser

When & where

4 September 2024

13:00 – 14:30

De Kikker, route 790

Building F, M325.00.054

Registration required via www.radboudumc.nl/research-events

About

Personalized medicine requires a comprehensive understanding of biological systems, for which multi-omics analysis can be a powerful approach. However, conducting thorough multi-omics research with reproducible results is challenging.

In this *Meet the Expert*, we will dive into practical guidelines to address these challenges. We will discuss concrete examples of multi-omics data sets and the tools we used for data-management and analysis. Moreover, we hope to answer questions from the audience on their own data: **Bring Your Own Data!**
